“It is to the old newspapers that we must go if we want to see the beginning of colonial fiction ... there are in the dusty files of these and other journals many stories of colonial life which have never struggled out of the papers into book form.” Clara Eyre Cheeseman, “Colonials in Fiction,” *NZ Illustrated Magazine* 7 no. 4 (1 January 1903): 274.

A New Zealand novel is defined as one first published in New Zealand, or with a significant reference to New Zealand or written by an author resident in New Zealand. Where a serial carries the byline “Written specially for,” “Specially written for” or “Written expressly for” it is assumed that the author is resident locally within New Zealand unless there is evidence to the contrary. In general, fictional works appearing in three or fewer episodes are excluded. Fiction written for children is not included.

ACKNOWLEDGEMENTS. To Papers Past, without which this project would have been too laborious to contemplate. To Rowan Gibbs, for generously sharing so much of the information on New Zealand fiction that he has accumulated over the years. To supportive librarians, particularly Linda Te Au of Information Services at the Invercargill Public Library who confirmed the details of one novel in the Invercargill *Weekly Times*, to the librarians at the Alexander Turnbull Library (especially Fiona Gray) and Victoria University Library who chased elusive references through the electronic databases, and the staff of the Turnbull and Auckland Public Library who hauled so many dusty old volumes out of their basements.
