ADVANCING FRONTIERS IN FOOD SCIENCE

## Feed Our Future: A New Zealand Sustainable Food Systems Dialogue

Official Journal of the New Zealand Association of Scientists

# New Zealand Science Review

## Vol 77(3–4) 2021

Official Journal of the New Zealand Association of Scientists  
P O Box 1874, Wellington  
www.scientists.org.nz

A forum for the exchange of views on science and science policy

Editor: Allen Petrey

Production Editor: Geoff Gregory

Guest Editor: Nick Smith

## Contents

### Feed Our Future – an opportunity to discuss the science of sustainable food systems –

*Warren McNabb* ..... 33

**Congratulations – Allen Petrey, for NZAS Council** ..... 71

### Nutrition comes first

Back to the future food systems – *Barbara Burlingame* ..... 35

Healthy and sustainable diets: providing nutrition, not only nutrients – *Thom Huppertz* ..... 38

The availability and affordability of nutrition – *Nick W. Smith* ..... 41

Discussion Session 1 ..... 44

### The current food system conversation

Origin of the current conversation: An exploration of the animal/plant divide – *Frédéric Leroy* ..... 45

Producing animal source food with respect for human and planetary health –

*Hannah H.E. van Zanten, Benjamin van Selm, Anita Frehner* ..... 48

Discussion Session 2 ..... 51

### Food systems impact

Our connected future with the turn-key technologies that are reducing food waste and improving nutrition – *Wayne Martindale* ..... 52

Environmental footprinting of New Zealand agricultural products and implications for food nutrition – *Stewart F. Ledgard* ..... 55

Discussion Session 3 ..... 59

### Changing the food system?

The changing face of protein production – *Paul Wood and Mahya Tavan* ..... 60

Consumers are central to any change in the food system – *Joanne Hort* ..... 63

Discussion Session 4 ..... 66

Overall conclusion on the audience discussions ..... 67

### Concluding commentary

Feeding the future: Reflections on the food systems discussion – *John Roche* ..... 68

## Instructions to Authors

*New Zealand Science Review* provides a forum for the discussion of science policy. It also covers science education, science planning, and freedom of information. It is aimed at scientists, decision makers, and the interested public. Readability and absence of jargon are essential.

Manuscripts on the above topics are welcome, and should be emailed to the editor (editor@scientists.org.nz).

As well as full papers, short contributions, reports on new developments and conferences, and reviews of books, all in the general areas of interest detailed above, are invited. The journal may also accept reviews of a general nature and research reports.

Full manuscripts (with author's name removed) will be sent for peer review, and authors will be sent copies of the reviewer's comments and a decision on publication. Manuscripts should not normally have appeared in print elsewhere, but already published results discussed in the different, special context of the journal will be considered.

Manuscripts should be accompanied by biographies of not more than 100 words on each author's personal history and current interests. Authors are also expected to supply a suitable high-definition passport-size photograph of themselves. This will be published with the article.

Articles may be submitted in MS Office Word, rich text format, or plain text. Diagrams and photographs should be on separate files (preferably eps, tif, jpg, at 300 dpi), not embedded in the text.

All tables and illustrations should be numbered separately – Tables 1, 2, 3, 4, etc., and Figures 1, 2, 3, 4, etc. – and be referred to in the text. Footnotes should be eliminated as far as possible. Diagrams and photographs will be printed in black and white, so symbols should be readily distinguishable without colour, and hatching should be used rather than block shading. However, colour may be used if the author or the author's institute is willing to pay for the added cost.

References should preferably be cited by the author–date (Harvard) system as described in the Lincoln University Press *Write Edit Print: Style Manual for Aotearoa New Zealand* (1997), which is also used as the standard for other editorial conventions. This system entails citing each author's surname and the year of publication in the text and an alphabetical listing of all authors cited at the end. Alternative systems may be acceptable provided that they are used accurately and consistently.
