<b>Guest editorial – Paul Moughan and Harjinder Singh</b> .....	73
<b>Riddet Institute Agri-Food Summit Meeting, Massey University, Wellington, 14 April 2010</b>	
<b><i>Positioning New Zealand’s Research and Education Resources</i></b>	
<b>Welcome – Paul Moughan</b> .....	74
<b>Opening address – Hon David Carter</b> .....	74
<b>Keynote address</b>	
Innovation: Key to future agri-food production – A.A. Dijkhuizen .....	76
<b>Papers</b>	
Challenges facing New Zealand science – P.D. Gluckman .....	80
Developing the food industries through focus on intangible capital – Andrew Cleland .....	83
A perspective on New Zealand universities – Lain Jager .....	92
Future foods, future needs: The challenges for science – Mike Boland .....	95
A university perspective on future food production – R. Ballard .....	100
<b>Closing address – Jim Watson</b> .....	103

### Instructions to Authors

*New Zealand Science Review* provides a forum for the discussion of science policy. It covers science and technology in their broadest sense and their impacts on society and the environment, both favourable and adverse. It also covers science education, science planning, and freedom of information. It is aimed at all scientists and decision makers, and the interested public. Readability and absence of jargon are essential.

Manuscripts on the above topics are welcome, two copies of which should be sent to:

The Editor  
NZ Association of Scientists  
P O Box 1874  
Wellington

As well as full papers, short contributions, reports on new developments and conferences, and reviews of books, all in the general areas of interest of the journal, are invited. The journal also accepts reviews of a general nature and research reports.

Full manuscripts (with author's name removed) will be evaluated and authors will be sent copies of the reviewer's comments and a decision on publication. Manuscripts should not normally have appeared in print elsewhere but already published results discussed in the different, special context of the journal will be considered. They should preferably not exceed 2500 words.

To facilitate anonymous review, author's names on manuscripts and any acknowledgement of assistance should be on a detachable

cover page. Manuscripts should be accompanied by biographies of not more than 100 words on each author's personal history and current interests. Authors are also expected to supply a suitable passport-size photograph of themselves.

Manuscripts should be typed double-spaced with wide margins on one side of the page. Articles may be submitted in Word for PC, rich text format, or plain text, by e-mail, or on floppy disk or CD-R, but a hardcopy should also be sent so that fidelity may be confirmed. Diagrams and photographs should be on separate files (preferably eps, tif, jpg, all at 300 dpi), not embedded in the text.

All tables and illustrations should be numbered separately – Tables 1, 2, 3, 4, etc., and Figures 1, 2, 3, 4, etc. – and be referred to in the text. Footnotes should be eliminated as far as possible. Diagrams and photographs will be printed in black and white, so symbols should be readily distinguishable without colour, and hatching should be used rather than block shading.

References should preferably be cited by the author-date (Harvard) system as described in the Lincoln University Press *Write Edit Print: Style Manual for Aotearoa New Zealand* (1997), which is also used as the standard for other editorial conventions. This system entails citing each author's surname and the year of publication in the text and an alphabetical listing of all author's cited at the end. Alternative systems may be acceptable provided that they are used accurately and consistently.
